EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alan Kagen on 12/17/10.

The application has been amended as follows:

Claims 28 and 53 are cancelled.

In claim 34, line 1, "claim 32" was changed to "claim 25".

In claim 85, line 2, "outwardly convex" was changed to "part-spherical central".

In claim 86, line 2, "outwardly convex" was changed to "part-spherical central".

2. The following is an examiner's statement of reasons for allowance: The closest prior art is US 4,889,248 to Bennett, who discloses a blending apparatus for a high speed blending operation comprising a container base 14 and a container lid 10-15, the container lid having mounted thereon blending means 16 arranged for a high speed rotation, the blending means extending through the lid and having, at one end, means 12 for connection to a drive motor external to the container and, at the other end, a blending element 16 for blending contents of the container when the drive means is operated, the blending means comprising a shaft portion locatable through an opening

Art Unit: 1774

in the lid and incorporating the connection means at its other end inside case 12 where it connects to the motor, and a blending element portion 16 associated with the shaft portion for rotation therewith, the container lid comprising a rim portion 22-30 defining a circumferential slot 22-30 into which the top edge of the container 14 is located when the lid and container are assembled together, wherein the rim portion is formed with successive, oppositely directed circumferential portions, a first of said portions lying in contact with or closely adjacent an inner side wall of the container when the lid and container are assembled together, and defining one side of the slot, and where the slot is defined by an outer portion arranged to extend around a top outer edge of the container and an inner portion arranged to extend into the container, a central portion in the middle of which is the opening for the blending means, and where the region in which the blending element operates has curved surfaces (figures 1-4). Bennett does not disclose that the central portion be part-spherical, that the outer edge of the part spherical central portion be turned through approximately 180 degrees to form the first circumferential portion, or that the upper end of the central portion should lie substantially level with the upper end of the container in use; nor are these modifications considered obvious over Bennett, alone or in combination with other prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Janca whose telephone number is (571) 270-5550. The examiner can normally be reached on M-Th 8-5:30.
